## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1-20 are rejected under 35 U.S.C. 102(e) as being anticipated by Skinner et al. (Skinner), U.S. Patent No. 6,529,737.

Regarding claims 1-20, Skinner discloses a method of message delivery from a wireless calling party terminal using a wireless communications network to a called party terminal, wherein the called party terminal has call waiting, the method comprising: determining that the called party terminal's line is busy; delivering a "call waiting no answer" message to the calling party terminal; prompting the calling party to leave a message for the called party; and storing the message from the calling party on the wireless communications network (see col. 6, line 35 to col. 7, line 30 and col. 8, lines 22-67 and col. 9, line 30 to col. 11, line 18).

### **Conclusion**

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 2686

Logan et al., U.S. Patent Pub. No. 2005/0153729, discloses a communication and control system using a network of location aware devices for message storage and transmission.

Gustavsson et al., U.S. Pat. Pub. No. 2004/0092252, discloses a method and apparatus for call notification and delivery to a busy mobile station.
